EMBARGOED UNTIL MARCH 11 AT 2:40PM EDT

Ranger Design Expands Lineup with New Trazer Canopy for Trucks and B-Series Van Shelving

INDIANAPOLIS, March 11, 2026 – Ranger Design, a leader in work vehicle storage solutions, is unveiling two major product innovations at NTEA Work Truck Week 2026: the **Trazer Canopy**, the newest addition to its Trazer Truck Utility System for pickup trucks, and the **B-Series**, a new entry-level shelving line for work vans.

Trazer Truck Utility System: The Trazer Canopy

Engineered for the demands of the field, the Trazer Canopy provides a weather-resistant, closed space in the truck bed with a unique anti-theft design. Its lift-up door with a gas shock ensures effortless access to larger and weather-sensitive equipment. The Canopy is designed to integrate seamlessly with the heavy-duty rack and toolboxes, creating a cohesive system that maximizes storage, protection, and organization across the entire truck bed. Like all Trazer Truck Utility System components, it is designed for a drill-free installation, making upfitting faster and preserving the integrity of the vehicle.

“With the Trazer Canopy, we are completing the final piece of the Trazer Truck Utility System, giving professionals a modular grow-as-you-need solution,” said Martin Lapointe, Ranger Design VP Business Development. “Combined with the rack and toolboxes, it delivers a fully integrated truck bed system that offers unmatched versatility, security, and efficiency for today’s trades.”

Unique in the marketplace, the modular Trazer Truck Utility System is now complete, comprising the foundational 1,000 lbs-capacity rack, secure toolboxes with compatible accessories, and now the new canopy, together forming a fully integrated solution designed to adapt to the evolving needs of trade professionals.

Expanding Access to Van Professionals: The B-Series Shelving

Ranger Design is also introducing the B-Series, a new entry-level shelving line designed for work vans. Built on over 35 years of expertise in van storage and fleet equipment, the B-Series delivers the quality and durability that Ranger Design is known for, now at an accessible price point suited to tradespeople, independent contractors, and growing fleets. Available for both low roof and high roof vans and comes in 36”, 48” and 60” lengths to fit a variety of van configurations.

About Ranger Design

Established in 1988, Ranger Design is the brainchild of two brothers with a shared passion for innovation and service. Offering leading-edge van storage systems and turnkey solutions for the past 35 years for fleets, OEMs, and tradespeople, Ranger Design has been committed to developing tough, innovative products to help fleet tradesmen work more efficiently and safely. With factories in Montreal (Canada), Rochester (NY), Seattle (WA), and Ladson (SC), plus a network of over 250 resellers across North America, Ranger Design has progressed far beyond its humble beginnings. In January 2025, Ranger Design was acquired by Clariance Technologies, further strengthening its position as a leader in work vehicle solutions and expanding its reach across the commercial transportation industry.

About Clariance Technologies

Clariance Technologies is a global leader of visibility, safety and digital technologies for transportation. Born from a collection of premium brands each with a long track record of innovation, its solutions include vehicle lighting, camera and vision systems, telematics and safety solutions that protect our world and our livelihoods by keeping people, assets and businesses safe, secure and productive. Its team of companies includes Truck-Lite, DAVCO, Road Ready, RIGID, Lumitec, ECCO, Code 3, LED Autolamps, Pressure Systems International, American Van, Prime Design, AMFS, RVS, Roll-Rite, Randall, Elkhart Brass, R.O.M., Foam Pro, FRC, Ranger Design and more. Product Presentation

Truck Utility System

The Trazer Truck Utility System (TUS), meticulously designed and engineered by Ranger Design's experts, is the pioneering fully modular pick-up accessory solution on the market. Packed with customizable options and late-point configurability, the TUS caters to the distinctive needs of tradespeople. It boasts life cycle upgradability and can be installed seamlessly without the need for drilling, ensuring a flawless upfit every time.

Trazer Canopy

Available Now

The Trazer Canopy is fully compatible with the Trazer heavy-duty rack and toolboxes, completing the TUS by offering a closed, secure space in the pick-up truck bed. Weather-resistant and featuring a unique anti-theft design, its lift-up door with a gas shock ensures easy access to the bed for hauling weather-sensitive and larger equipment.

B-Series Shelving

Available Now

The B-Series is Ranger Design's new entry-level shelving solution for work vans. Designed for straightforward installation and everyday professional use, the B-Series brings the quality and durability of Ranger Design products to a broader range of tradespeople and budgets. Ideal for independent contractors, small businesses, and growing fleets looking for a reliable van shelving system.
